

REMOVED APPLICANT REQUEST FOR RECONSIDERATION (MULTIPLE APPLICATIONS)

Under title 2, section 60844, subdivision (a)(1) of the California Code of Regulations, submitting more than one application during either Phase I or Phase II of the application process is grounds for removing an applicant from the applicant pool. Therefore, you can no longer be considered for selection to the commission.

If you believe there are compelling circumstances that justify reversal of this determination, you may seek reconsideration. To request reconsideration, you must complete this form and submit it to the Bureau of State Audits within 10 days of receiving this notice. Upon receiving the information provided in the form, we will evaluate your request and notify you as to whether you will be allowed to regain your eligibility for participating in the selection process.

Please provide the following information and submit it to the Bureau of State Audits by e-mail, facsimile, or delivery to the address stated at the bottom of this form. This form must be received by the bureau no later than February 27.

Name: Robert Bennett

Explanation of compelling circumstances: I was very excited to learn about this opportunity. I heard about it on a radio station. I quickly got home and began the application process. I completed the online application and submitted it. I immediately got a notice of disqualification because I had indicated that I had not been affiliated with the same political party for at least five years. I have been affiliated with my party for more than 20 years. When I realized the error I made, I immediately submitted a correct application using my business email. I did not realize that I had violated part of the code during the application process.

I am very passionate about wanting to be a part of this commission. I will review all applications, forms and guidelines more thoroughly in the future. Thank you.

I affirm, by signing or typing my name below, that the statements contained in this Request For Reconsideration are true and correct to the best of my knowledge.
